

# A MEETING ROOM LIKE NO OTHER

Welcome to the Agora. Here, at the centre of the creative world in London's Bankside, every single aspect of the room has been chosen to create the perfect innovative work environment.

## SCATTERED IDEAS

Increase attention and memory with doodles, brainstorms and notes on this flexible wall which can be used as a whiteboard or a pin board using magnetic terrazzo style pieces.

## CUSTOM VIDEO ART

A specially commissioned piece of video art by artist Doug Foster provides a hypnotic 5-minute break and features hints of Hilton London Bankside and its surrounding area.

## CRUX OF CREATIVITY

The beautiful custom-built table in the centre of the room features inlaid ley lines, highlighting inspiring creative sites around Bankside, and hidden plug sockets providing a fuss-free solution for charging devices.

## NATURAL LIGHT

Improve work performance with the controllable skylight – which beams the room with the perfect light to boost creativity.

## ELIXIRS OF REVELATION

The creativity tea station available in the Agora features a specially curated menu proven to boost brain power, from increasing blood circulation to improving memory.

## GO WIRELESS

The 75 inch screen allows seamless, wireless connection to your devices - ending the misery of connection difficulties often experienced in meeting rooms.

## THE LATEST TECHNOLOGY

The interactive screen features award-winning Clevertouch® technology opening you up to a multitude of features including multi-device mirroring and a digital whiteboard.

## MOOD LIGHTING

Change the atmosphere at the touch of a button with the mood lighting feature. Choose from a range of colours or brightness levels to set the right tone for the task at hand.

## PRESS FOR CREATIVITY

Turn any dull moments on their head at the press of a button. The Agora's gold button will engulf the room with a jet of aromatic cool air to revive stimulation.

## NATURAL MATERIALS

Making a stand against the usual clinical meeting room, the sculptural feature wall is inspired by earth layers and ensures warmth and comfort.
